# PROJECTS

- **RESTAURANT WEB APPLICATION**

- Worked as freelance web developer
- Made this static web application using HTML, CSS, JS and BOOTSTRAP for displaying the menu.

- **WEBINFO TOOL**

- Tool to show what websites are built with. Find out what CMS a website is using, as well as any framework, ecommerce platform, JavaScript libraries and many more.

- **STOCKTICKER WEB APP**

- This tool helps to analyze the data from yahoo finance of different stocks and represent them visually as a graph.

- **STOCKTICKER CLI**

- This works on Command line Interface. I have not used any API, I used web scraping method to fetch the real time data of the stock. Inshort, It is an API!

---
